# Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics)

*Pasquale Maddaloni, Marco Bellini, Paolo De Natale*

**Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics)** Pasquale Maddaloni, Marco Bellini, Paolo De Natale

*Foreword by Nobel laureate Professor Theodor W. Hänsch of Ludwig-Maximilians-Universität München*

Based on the authors' experimental work over the last 25 years, **Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook** presents basic concepts, state-of-the-art applications, and future trends in optical, atomic, and molecular physics. It provides all the background information on the main kinds of laser sources and techniques, offers a detailed account of the most recent results obtained for time- and frequency-domain applications of lasers, and develops the theoretical framework necessary for understanding the experimental applications.

After a historical introduction, the book describes the basic concepts and mathematical tools required for studying the physics of oscillators. It then discusses microwave and optical resonators, crucial aspects of operation and fundamental properties of lasers, and precision spectroscopy and absolute frequency metrology. It also focuses on microwave and optical frequency standards and explores current and potential research directions.

Accessible to scientists, postdoc researchers, and advanced undergraduate students, this self-contained book gives a wide-ranging, balanced overview of the areas—including frequency standards and clocks, ultra-high-precision spectroscopy, quantum information, and environmental metrology—revolutionized by the recent advent of optical frequency comb synthesizers (OFCs) based on femtosecond mode-locked lasers. The book is also a useful guide to cutting-edge research for manufacturers of advanced laser systems and optical devices.

**From reader reviews:**

**Calvin Baker:**

Hey guys, do you wish to find a new book to read? Maybe the book with the subject Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) suitable to you? The actual book was written by renowned writer in this era. The particular book entitled Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) is the main of several books that will everyone read now. This book was inspired a number of people in the world. When you read this book you will enter the new shape that you ever know before. The author explained their strategy in the simple way, consequently all of people can easily to understand the core of this reserve. This book will give you a large amount of information about this world now. To help you to see the represented of the world in this book.

**Ray Ellis:**

The particular book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) will bring someone to the new experience of reading a book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very suited to you. The book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) is much recommended to you you just read. You can also get the e-book from official web site, so you can quickly to read the book.

**Shaun Richards:**

Do you have something that you want such as book? The reserve lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not trying Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) that give your satisfaction preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the method for people to know world a great deal better than how they react when it comes to the world. It can't be explained constantly that reading practice only for the geeky person but for all of you who wants to be success person. So, for all of you who want to start looking at as your good habit, you may pick Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) become your own personal starter.

**Samuel Freeman:**

As we know that book is vital thing to add our expertise for everything. By a book we can know everything we wish. A book is a range of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This e-book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) was filled concerning science. Spend your spare time to

add your knowledge about your science competence. Some people has diverse feel when they reading the book. If you know how big selling point of a book, you can really feel enjoy to read a e-book. In the modern era like at this point, many ways to get book that you simply wanted.
