## Activists and Advocates: Toronto's Health Department 1883-1983 Heather MacDougall

For more than a century, Toronto's Health Department has served as a model of evolving municipal public health services in Canada and beyond. From horse manure to hippies and small pox to AIDS, the Department's staff have established and maintained standards of environmental cleanliness and communicable disease control procedures that have made the city a healthy place to live.

This centennial history analyzes the complex interaction of politics, patronage and professional aspirations which determine the success or failure of specific policies and programs. As such, it fills a long neglected gap in our understanding of the development of local health services.

Using Toronto's changing circumstances as a backdrop, the book details the evolution of the international public health movement through its various phases culminating in the modern emphasis on health promotion and health advocacy. By so doing, it demonstrates the significant contribution of preventive medicine and public health activities to Canadian life
