## Specialty Construction Techniques for Dam and Levee Remediation

Dam and levee remediation has become more prevalent since the start of the twenty-first century. Given the vastness and complexity of the infrastructures involved, keeping up with maintenance needs is very difficult. Major surges in repair are usually triggered by nature's wake-up calls, such as hurricanes, floods, and earthquakes. The challenge has been to develop methods that ensure safe, effective, reliable, and robust solutions for current and future remediation issues. **Specialty Construction Techniques for Dam and Levee Remediation** presents the state of practice in North American dam and levee remediation as it relates to the use of specialty geotechnical construction techniques, such as anchors, grouting, cutoff (diaphragm) walls, and deep mixing.

The book focuses on the actual construction processes, describing design and performance aspects of remediation where appropriate. Chapters deal with the application of drilling and grouting methods, methods to install mix-in-place (category 2) cutoff structures, excavated and backfilled trenches (category 1), composite cutoff walls, and stabilization using prestressed rock anchors. The book also provides a comprehensive guide to dam and levee instrumentation, covering planning, operating principles, data management, staffing, and automation. As an educational and salutary example of ineffective efforts, the final chapter presents a case history of a series of remediations performed on a single project, which ultimately proved unsuccessful.

A wide range of methods has been developed in response to the challenges that arise in the dam and levee remediation arena and the need for a competitive edge. These new methods are designed and monitored using state-of-the-art techniques, giving rise to the emergence of new intensity and initiative in this field. This book captures this transformation by examining the theory and practice of contemporary remedial techniques, using recent U.S. case histories to provide knowledge and inspiration to readers, both in North America and around the world.

### From reader reviews:

#### **Bruce Parisien:**

Here thing why this Specialty Construction Techniques for Dam and Levee Remediation are different and reliable to be yours. First of all reading through a book is good nevertheless it depends in the content from it which is the content is as tasty as food or not. Specialty Construction Techniques for Dam and Levee Remediation giving you information deeper and in different ways, you can find any reserve out there but there is no e-book that similar with Specialty Construction Techniques for Dam and Levee Remediation. It gives you thrill examining journey, its open up your own eyes about the thing that will happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in park, café, or even in your way home by train. For anyone who is having difficulties in bringing the published book maybe the form of Specialty Construction Techniques for Dam and Levee Remediation in e-book can be your option.

#### **Robert Marshall:**

In this age globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you personally is Specialty Construction Techniques for Dam and Levee Remediation this publication consist a lot of the information on the condition of this world now. This book was represented just how can the world has grown up. The words styles that writer use to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book suitable all of you.

#### **Jean Taylor:**

Do you like reading a book? Confuse to looking for your preferred book? Or your book had been rare? Why so many question for the book? But any kind of people feel that they enjoy intended for reading. Some people likes looking at, not only science book but additionally novel and Specialty Construction Techniques for Dam and Levee Remediation or perhaps others sources were given know-how for you. After you know how the great a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to bring their knowledge. In other case, beside science publication, any other book likes Specialty Construction Techniques for Dam and Levee Remediation to make your spare time far more colorful. Many types of book like this.

#### **Billie Gallagher:**

Publication is one of source of knowledge. We can add our information from it. Not only for students and also native or citizen require book to know the up-date information of year to help year. As we know those publications have many advantages. Beside all of us add our knowledge, could also bring us to around the world. By the book Specialty Construction Techniques for Dam and Levee Remediation we can get more advantage. Don't that you be creative people? To become creative person must prefer to read a book. Merely

choose the best book that suited with your aim. Don't end up being doubt to change your life at this time book Specialty Construction Techniques for Dam and Levee Remediation. You can more attractive than now.
