## **Analysis Techniques for Racecar Data Aquisition** Jorge Segers

Racecar data acquisition used to be limited to well-funded teams in high-profile championships. Today the cost of electronics has decreased dramatically making them available to everyone. But the cost of any data acquisition system is a waste of money if the recorded data is not interpreted correctly.

This book updated from the best-selling 2008 edition contains techniques for analyzing data recorded by any vehicle's data acquisition system. It details how to measure the performance of the vehicle and driver what can be learned from it and how this information can be used to advantage next time the vehicle hits the track. Such information is invaluable to racing engineers and managers race teams and racing data analysts in all motorsports.

Whether measuring the performance of a Formula One racecar or that of a road-legal street car on the local drag strip the dynamics of vehicles and their drivers remain the same. Identical analysis techniques apply.

Some race series have restricted data logging to decrease the team's running budgets. In these cases it is extremely important that a maximum of information is extracted and interpreted from the hardware at hand. A team that uses data more efficiently will have an edge over the competition.

However the ever-decreasing cost of electronics makes advanced sensors and logging capabilities more accessible for everybody. With this comes the risk of information overload. Techniques are needed to help draw the right conclusions quickly from very large data sets.

In addition to updates throughout this new edition contains three new chapters: one on techniques for analyzing tire performance one that provides an introduction to metric-driven analysis a technique that is used throughout the book and another that explains what kind of information the data contains about the track.

### **From reader reviews:**

#### **Luis Gray:**

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a reserve. Book has a different type. As it is known to us that book is important factor to bring us around the world. Next to that you can your reading skill was fluently. A guide Analysis Techniques for Racecar Data Aquisition will make you to possibly be smarter. You can feel far more confidence if you can know about every little thing. But some of you think in which open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you seeking best book or suited book with you?

#### **Jorge Raines:**

In this 21st centuries, people become competitive in each way. By being competitive right now, people have do something to make these survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yep, by reading a book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading any book, we give you this Analysis Techniques for Racecar Data Aquisition book as nice and daily reading guide. Why, because this book is more than just a book.

#### **Megan Lapointe:**

Hey guys, do you desires to finds a new book to study? May be the book with the name Analysis Techniques for Racecar Data Aquisition suitable to you? Often the book was written by famous writer in this era. The book untitled Analysis Techniques for Racecar Data Aquisitionis the main one of several books that will everyone read now. That book was inspired a number of people in the world. When you read this book you will enter the new way of measuring that you ever know before. The author explained their idea in the simple way, consequently all of people can easily to understand the core of this publication. This book will give you a great deal of information about this world now. So that you can see the represented of the world on this book.

#### **Jo Jordan:**

Playing with family in the park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try thing that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Analysis Techniques for Racecar Data Aquisition, it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.
