## **Biowarrior: Inside the Soviet/Russian Biological War Machine** Igor V. Domaradskij

This extraordinary memoir by a leading Russian scientist who worked for decades at the nerve center of the top-secret "Biopreparat" offers a chilling look into the biological weapons program of the former Soviet Union, vestiges of which still exist today in the Russian Federal Republic. Igor Domaradskij calls himself an "inconvenient man": a dedicated scientist but a nonconformist who was often in conflict with government and military apparatchiks. In this book he reveals the deadly nature of the research he participated in for almost fifteen years.

Domaradskij goes into great detail about the secrecy, intrigue, and the bureaucratic maze that enveloped the Biopreparat scientists, making them feel like helpless pawns. What stands out in his account is the hasty, patchwork nature of the Soviet effort in bioweaponry. Far from being a smooth-running, terrifying monolith, this was an enterprise cobbled together out of the conflicts and contretemps of squabbling party bureaucrats, military know-nothings, and restless, ambitious scientists. In some ways the inefficiency and lack of accountability in this system make it all the more frightening as a worldwide threat. For today its dimensions are still not fully known, nor is it certain that any one group is completely in control of the proliferation of this lethal weaponry.

*Biowarrior* is disturbing but necessary reading for anyone wishing to understand the nature and dimensions of the biological threat in an era of international terrorism.
