Michael H. Rubinstein

Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) Michael H. Rubinstein

This volume focuses on the evaluation of different types of polymeric materials used in controlled drug delivery, presenting in vivo data alongside research work concerned with the physico-chemical factors influencing drug release. The book reflects the current interest in the search for a controlled drug release system which is simple to produce on a mass production scale, is applicable to a wide range of drugs with different chemical properties, is truly physiologically inert and at the same time capable of being able to release the drug at differing rates. The authors offer an understanding of how drug delivery systems act, discussing many aspects of controlled drug release technology. Being the first of a series of books concerned with pharmaceutical technology developments, the research work presented covers actual work in progress by academic research groups from laboratories all around the world. It features the recently innovated nasal absorption of drugs and highlights absorption of drugs through skin at a controlled rate. It investigates the use of specific surfactants to improve the process of percutaneous absorption; whilst an important problem concerning drug absorption is highlighted when it is shown that propranolol hydrochloride absorption can be affected not just by the design of the dosage form, but also by the concomitant administration of other drugs, eg antacids. Future controlled release drug delivery systems may have to be designed for such factors in mind.

From reader reviews:

Donna Moore:

The experience that you get from Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) may be the more deep you digging the information that hide inside words the more you get thinking about reading it. It does not mean that this book is hard to be aware of but Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) giving you thrill feeling of reading. The article author conveys their point in specific way that can be understood by means of anyone who read the item because the author of this guide is well-known enough. This book also makes your vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We suggest you for having this particular Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) instantly.

Heather Killen:

You are able to spend your free time to read this book this reserve. This Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) is simple to deliver you can read it in the recreation area, in the beach, train in addition to soon. If you did not have got much space to bring the printed book, you can buy the e-book. It is make you easier to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Thomas Manna:

In this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become one of it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to have a look at some books. Among the books in the top checklist in your reading list is Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology). This book which is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upwards and review this book you can get many advantages.

Nathaniel Mitchell:

That reserve can make you to feel relax. This book Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) was colourful and of course has pictures on there. As we know that book Pharmaceutical Technology: Controlled Drug Release (Ellis Horwood series in pharmaceutical technology) has many kinds or type. Start from kids until teens. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you and try to like reading which.
