Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function

Juergen Mai

NOTE: This is a single chapter excerpted from the book *The Human Nervous System*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

The previous two editions of the **Human Nervous System** have been the standard reference for the anatomy of the central and peripheral nervous system of the human. The work has attracted nearly 2000 citations, demonstrating that it has a major influence in the field of neuroscience. The third edition is a complete and updated revision, with new chapters covering genes and anatomy, gene expression studies, and glia cells. The book continues to be an excellent companion to the **Atlas of the Human Brain**, and a common nomenclature throughout the book is enforced. Physiological data, functional concepts, and correlates to the neuroanatomy of the major model systems (rat and mouse) as well as brain function round out the new edition.

ENDORSED BY SOCIETY FOR BRAIN MAPPING AND THERAPEUTICS (SBMT) - SBMT is a non-profit society organized for the purpose of encouraging basic and clinical scientists who are interested in areas of Brain Mapping, engineering, stem cell, nanotechnology, imaging and medical device to improve the diagnosis, treatment and rehabilitation of patients afflicted with neurological disorders. This society promotes the public welfare and improves patient care through the translation of new technologies/therapies into life saving diagnostic and therapeutic procedures. The Society is focused in breaking boundaries of science, technology, medicine, art and healthcare policy. For more information about how to become a member or participate in SBMT programs please visit: www.WorldBrainMapping.org

*Adopts standard nomenclature following the new scheme by Paxinos, Watson, and Puelles and aligned with the Mai et al. Atlas of the Human Brain (new edition in 2007)

* Full color throughout with many new and significantly enhanced illustrations

* Provides essential reference information for users in conjunction with brain atlases for the identification of brain structures, the connectivity between different areas, and to evaluate data collected in anatomical, physiological, pharmacological, behavioural, and imaging studies

From reader reviews:

Richard Twombly:

What do you with regards to book? It is not important to you? Or just adding material when you require something to explain what the one you have problem? How about your spare time? Or are you busy person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have time? What did you do? All people has many questions above. They should answer that question simply because just their can do that will. It said that about publication. Book is familiar in each person. Yes, it is suitable. Because start from on guardería until university need this Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function to read.

David Barr:

People live in this new moment of lifestyle always attempt to and must have the time or they will get large amount of stress from both day to day life and work. So , whenever we ask do people have time, we will say absolutely sure. People is human not really a huge robot. Then we ask again, what kind of activity have you got when the spare time coming to anyone of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative with spending your spare time, often the book you have read will be Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function.

Wayne Queen:

That e-book can make you to feel relax. This book Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function was multi-colored and of course has pictures on there. As we know that book Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function has many kinds or type. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that will.

Peggy Dunn:

Reading a guide make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is created or printed or illustrated from each source this filled update of news. In this modern era like now, many ways to get information are available for you. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just looking for the Chapter 029, Lower Brainstem Regulation of Visceral, Cardiovascular, and Respiratory Function when you required it?
