Data Mining and Knowledge Discovery for Geoscientists Guangren Shi

Currently there are major challenges in data mining applications in the geosciences. This is due primarily to the fact that there is a wealth of available mining data amid an absence of the knowledge and expertise necessary to analyze and accurately interpret the same data. Most geoscientists have no practical knowledge or experience using data mining techniques. For the few that do, they typically lack expertise in using data mining software and in selecting the most appropriate algorithms for a given application. This leads to a paradoxical scenario of "rich data but poor knowledge".

The true solution is to apply data mining techniques in geosciences databases and to modify these techniques for practical applications. Authored by a global thought leader in data mining, *Data Mining and Knowledge Discovery for Geoscientists* addresses these challenges by summarizing the latest developments in geosciences data mining and arming scientists with the ability to apply key concepts to effectively analyze and interpret vast amounts of critical information.

- Focuses on 22 of data mining's most practical algorithms and popular application samples
- Features 36 case studies and end-of-chapter exercises unique to the geosciences to underscore key data mining applications
- Presents a practical and integrated system of data mining and knowledge discovery for geoscientists
- Rigorous yet broadly accessible to geoscientists, engineers, researchers and programmers in data mining
- Introduces widely used algorithms, their basic principles and conditions of applications, diverse case studies, and suggests algorithms that may be suitable for specific applications

From reader reviews:

Mary McClellan:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the Mall. How about open as well as read a book eligible Data Mining and Knowledge Discovery for Geoscientists? Maybe it is for being best activity for you. You understand beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have additional opinion?

Elizabeth Brown:

A lot of people always spent their free time to vacation or even go to the outside with them family or their friend. Do you know? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you want to try to find a new activity that's look different you can read a new book. It is really fun in your case. If you enjoy the book you read you can spent all day every day to reading a guide. The book Data Mining and Knowledge Discovery for Geoscientists it is extremely good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. If you did not have enough space to create this book you can buy often the e-book. You can m0ore very easily to read this book through your smart phone. The price is not too expensive but this book provides high quality.

Yolanda Nitta:

This Data Mining and Knowledge Discovery for Geoscientists is great guide for you because the content which is full of information for you who all always deal with world and still have to make decision every minute. This kind of book reveal it information accurately using great arrange word or we can point out no rambling sentences in it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but difficult core information with lovely delivering sentences. Having Data Mining and Knowledge Discovery for Geoscientists in your hand like obtaining the world in your arm, data in it is not ridiculous 1. We can say that no e-book that offer you world within ten or fifteen second right but this e-book already do that. So , this is good reading book. Heya Mr. and Mrs. stressful do you still doubt that?

Gerard Armstrong:

Book is one of source of information. We can add our know-how from it. Not only for students but native or citizen require book to know the upgrade information of year to be able to year. As we know those books have many advantages. Beside we add our knowledge, can bring us to around the world. By book Data Mining and Knowledge Discovery for Geoscientists we can acquire more advantage. Don't someone to be creative people? Being creative person must prefer to read a book. Only choose the best book that suitable with your aim. Don't possibly be doubt to change your life with this book Data Mining and Knowledge

Discovery for Geoscientists. You can more appealing than now.
