Behind the Curve: Science and the Politics of Global Warming (Weyerhaeuser environmental books)

Joshua P. Howe

In *Behind the Curve*, Joshua Howe explores the history of global warming from its roots as a scientific curiosity to its place at the center of international environmental politics. While the “science first” forms of advocacy scientists developed to fight global warming produced more and better science, the primacy of science in global warming politics has failed to produce meaningful results. In fact, an often exclusive focus on science has left advocates for change vulnerable to political opposition and has limited much of the discussion to debates about the science itself.
