David Attenborough's First Life: A Journey Back in Time with Matt Kaplan Matt Kaplan

The epic story of the beginning of life on Earth from the much loved and respected naturalist, writer and broadcaster, Sir David Attenborough.

Spanning billions of years, Attenborough's time-travelling narrative brings the reader face to face with the first animals that ever existed. By using the latest technology, we are finally able to see for ourselves how these early animals would have looked like and how they would have lived. Attenborough also shows us how some of the evolutionary features of these most primitive creatures are alive today in modern animals, including us humans.

Attenborough shows us how the evolution of the first eyes, the first solid body parts and the first feet and backbones came to be. Looking at global ice ages and volcanic eruptions he also shows how evolution is heavily connected with the history of the planet.

In this groundbreaking investigation, Attenborough travels the world, from Canada to Australia and Morocco to unearth the secrets hidden in prehistoric fossils, providing a deeper understanding of the first living creatures and the origins of our evolutionary traits.
