Teaming: How Organizations Learn, Innovate, and Compete in the Knowledge Economy Amy C. Edmondson

New breakthrough thinking in organizational learning, leadership, and change

Continuous improvement, understanding complex systems, and promoting innovation are all part of the landscape of learning challenges today's companies face. Amy Edmondson shows that organizations thrive, or fail to thrive, based on how well the small groups within those organizations work. In most organizations, the work that produces value for customers is carried out by teams, and increasingly, by flexible team-like entities. The pace of change and the fluidity of most work structures means that it's not really about creating effective teams anymore, but instead about leading effective teaming.

Teaming shows that organizations learn when the flexible, fluid collaborations they encompass are able to learn. The problem is teams, and other dynamic groups, don't learn naturally. Edmondson outlines the factors that prevent them from doing so, such as interpersonal fear, irrational beliefs about failure, groupthink, problematic power dynamics, and information hoarding. With *Teaming*, leaders can shape these factors by encouraging reflection, creating psychological safety, and overcoming defensive interpersonal dynamics that inhibit the sharing of ideas. Further, they can use practical management strategies to help organizations realize the benefits inherent in both success and failure.

- Presents a clear explanation of practical management concepts for increasing learning capability for business results
- Introduces a framework that clarifies how learning processes must be altered for different kinds of work
- Explains how Collaborative Learning works, and gives tips for how to do it well
- Includes case-study research on Intermountain healthcare, Prudential, GM, Toyota, IDEO, the IRS, and both Cincinnati and Minneapolis Children's Hospitals, among others

Based on years of research, this book shows how leaders can make organizational learning happen by building teams that learn.

Michael Major:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's internal or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's

country. Therefore this Teaming: How Organizations Learn, Innovate, and Compete in the Knowledge Economy can make you truly feel more interested to read.
