Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) William Jones

With its theme, "Our Information, Always and Forever," Part I of this book covers the basics of personal information management (PIM) including six essential activities of PIM and six (different) ways in which information can be personal to us. Part I then goes on to explore key issues that arise in the "great migration" of our information onto the Web and into a myriad of mobile devices.

Part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of PIM and, through these practices, the way we lead our lives.

Part 2 is in five chapters:

- Chapter 5. Technologies of Input and Output. Technologies in support of gesture, touch, voice, and even eye movements combine to support a more natural user interface (NUI). Technologies of output include glasses and "watch" watches. Output will also increasingly be animated with options to "zoom".

- Chapter 6. Technologies to Save Our Information. We can opt for "life logs" to record our experiences with increasing fidelity. What will we use these logs for? And what isn't recorded that should be?

- Chapter 7. Technologies to Search Our Information. The potential for personalized search is enormous and mostly yet to be realized. Persistent searches, situated in our information landscape, will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information.

- Chapter 8. Technologies to Structure Our Information. Structure is key if we are to keep, find, and make effective use of our information. But how best to structure? And how best to share structured information between the applications we use, with other people, and also with ourselves over time? What lessons can we draw from the failures and successes in web-based efforts to share structure?

- Chapter 9. PIM Transformed and Transforming: Stories from the Past, Present and Future. Part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today. And then we consider what the world of information is likely to look like in 2057. Licklider estimated that he spent 85% of his "thinking time" in activities that were clerical and mechanical and might (someday) be delegated to the computer. What percentage of our own time is spent with the clerical and mechanical? What about in 2057?

From reader reviews:

Leslie Marcellus:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S). Try to make the book Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) as your buddy. It means that it can to be your friend when you truly feel alone and beside that course make you smarter than ever before. Yeah, it is very fortuned for you. The book makes you considerably more confidence because you can know every little thing by the book. So , we need to make new experience in addition to knowledge with this book.

Hayden Wolfe:

As people who live in the particular modest era should be change about what going on or information even knowledge to make these keep up with the era that is always change and progress. Some of you maybe may update themselves by studying books. It is a good choice for you but the problems coming to anyone is you don't know which you should start with. This Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

Morris Sampson:

Does one one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you never know the inside because don't assess book by its handle may doesn't work at this point is difficult job because you are frightened that the inside maybe not since fantastic as in the outside look likes. Maybe you answer is usually Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) why because the wonderful cover that make you consider with regards to the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly make suggestions to pick up this book.

Jason Davis:

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library or make summary for some book, they are complained. Just little students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to there but

nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) can make you truly feel more interested to read.
