## **Cost-sharing and Accessibility in Higher Education: A Fairer Deal?: 14 (Higher Education Dynamics)**

Pedro N. Teixeira, D. Bruce Johnstone, Maria J. Rosa, Hans Vossensteyn

Higher education finances lie at the crossroads in many Western countries. Hence, worldwide, the most common approach to the need for increasing revenue was to use some form or forms of cost sharing, or the shift of some of the higher educational per-student costs from governments and taxpayers to parents and students. This raises several important challenges to higher education systems. First, there is the political and social controversy associated with most forms of cost-sharing, particularly with tuition fees. Secondly, there are important issues in terms of the broad context of social policy, such as the role of families and students and the relationship that the state establishes with each of them. Third, there is the comparison of alternative instruments of cost-sharing and the direct and indirect effects of each of them, notably in terms of educational equality. Overall, underlying cost-sharing debates are fundamental questions about social choice, individual opportunities, and the role of government in society.
