Statistical Methods Rudolf J. Freund, Donna Mohr, William J. Wilson

Statistical Methods, 3e provides students with a working introduction to statistical methods offering a wide range of applications that emphasize the quantitative skills useful across many academic disciplines. This text takes a classic approach emphasizing concepts and techniques for working out problems and interpreting results. The book includes research projects, real-world case studies, numerous examples and data exercises organized by level of difficulty. This text requires that a student be familiar with algebra.

New to this edition:

- NEW expansion of exercises applying different techniques and methods
- NEW examples and datasets using current real-world data
- New text organization to create a more natural connection between regression and the Analysis of the Variance
- NEW material on generalized linear models
- NEW expansion of nonparametric techniques
- NEW student research projects
- NEW case studies for gathering, summarizing, and analyzing data

Supplements:

- NEW companion website with downloadable data sets and additional resources including live links to statistical software such as SAS and SPSS
 - Student Solutions Manual - to come
 - Instructor Manual - to come
 - Sample chapter - <http://www.elsevierdirect.com/product.jsp?isbn=9780123749703>
-
- Integrates the classical conceptual approach with modern day computerized data manipulation and computer applications
 - Accessible to students who may not have a background in probability or calculus
 - Offers reader-friendly exposition, without sacrificing statistical rigor
 - Includes many new data sets in various applied fields such as Psychology, Education, Biostatistics, Agriculture, Economics

From reader reviews:

Billie Sneed:

As people who live in the modest era should be upgrade about what going on or details even knowledge to make all of them keep up with the era that is certainly always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice for you but the problems coming to you is you don't know what type you should start with. This Statistical Methods is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Cameron Rodriquez:

Nowadays reading books be a little more than want or need but also get a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with education and learning books but if you want truly feel happy read one along with theme for entertaining for instance comic or novel. The particular Statistical Methods is kind of publication which is giving the reader unforeseen experience.

Vincent Olson:

Information is provisions for those to get better life, information currently can get by anyone from everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is inside the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you find the unstable resource then you have it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Statistical Methods as your daily resource information.

Teresa White:

Often the book Statistical Methods has a lot of information on it. So when you check out this book you can get a lot of advantage. The book was compiled by the very famous author. Mcdougal makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.
