Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept

Kumar S. Ray

Soft Computing Approach to Pattern Classification and Object Recognition establishes an innovative, unified approach to supervised pattern classification and model-based occluded object recognition. The book also surveys various soft computing tools, fuzzy relational calculus (FRC), genetic algorithm (GA) and multilayer perceptron (MLP) to provide a strong foundation for the reader.

The supervised approach to pattern classification and model-based approach to occluded object recognition are treated in one framework, one based on either a conventional interpretation or a new interpretation of multidimensional fuzzy implication (MFI) and a novel notion of fuzzy pattern vector (FPV). By combining practice and theory, a completely independent design methodology was developed in conjunction with this supervised approach on a unified framework, and then tested thoroughly against both synthetic and real-life data.

In the field of soft computing, such an application-oriented design study is unique in nature. The monograph essentially mimics the cognitive process of human decision making, and carries a message of perceptual integrity in representational diversity.

Soft Computing Approach to Pattern Classification and Object Recognition is intended for researchers in the area of pattern classification and computer vision. Other academics and practitioners will also find the book valuable.

From reader reviews:

Kathie Richmond:

Book is to be different for each grade. Book for children till adult are different content. As it is known to us that book is very important usually. The book Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept had been making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The reserve Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept is not only giving you a lot more new information but also to be your friend when you really feel bored. You can spend your current spend time to read your publication. Try to make relationship together with the book Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept. You never experience lose out for everything in case you read some books.

Sandra Yunker:

The book Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept will bring one to the new experience of reading a book. The author style to spell out the idea is very unique. In the event you try to find new book to see, this book very acceptable to you. The book Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept is much recommended to you you just read. You can also get the e-book from the official web site, so you can quickly to read the book.

Carol Ray:

Reading a book being new life style in this season; every people loves to learn a book. When you read a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you want to get information about your study, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, and also soon. The Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept provide you with new experience in looking at a book.

Phyllis Ramirez:

You may get this Soft Computing Approach to Pattern Classification and Object Recognition: A Unified Concept by check out the bookstore or Mall. Just viewing or reviewing it might to be your solve problem if you get difficulties on your knowledge. Kinds of this e-book are various. Not only by simply written or printed but can you enjoy this book by means of e-book. In the modern era similar to now, you just looking of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.
