Indexing Techniques for Advanced Database Systems (Advances in Database Systems) Elisa Bertino, Beng Chin Ooi, Ron Sacks-Davis, Kian-Lee Tan, Justin Zobel, Boris Shidlovsky, Daniele Andronico
Recent years have seen an explosive growth in the use of new database applications such as CAD/CAM systems, spatial information systems, and multimedia information systems. The needs of these applications are far more complex than traditional business applications. They call for support of objects with complex data types, such as images and spatial objects, and for support of objects with wildly varying numbers of index terms, such as documents. Traditional indexing techniques such as the B-tree and its variants do not efficiently support these applications, and so new indexing mechanisms have been developed. As a result of the demand for database support for new applications, there has been a proliferation of new indexing techniques.

The need for a book addressing indexing problems in advanced applications is evident. For practitioners and database and application developers, this book explains best practice, guiding the selection of appropriate indexes for each application. For researchers, this book provides a foundation for the development of new and more robust indexes. For newcomers, this book is an overview of the wide range of advanced indexing techniques.

Indexing Techniques for Advanced Database Systems is suitable as a secondary text for a graduate level course on indexing techniques, and as a reference for researchers and practitioners in industry.

From reader reviews:

Eden Davis:

What do you consider book? It is just for students since they are still students or it for all people in the world, exactly what the best subject for that? Just simply you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be compelled someone or something that they don't would like do that. You must know how great and important the book Indexing Techniques for Advanced Database Systems (Advances in Database Systems). All type of book could you see on many methods. You can look for the internet options or other social media.

Ann Edwards:

You may spend your free time to read this book this guide. This Indexing Techniques for Advanced Database Systems (Advances in Database Systems) is simple to bring you can read it in the park your car, in the beach, train along with soon. If you did not possess much space to bring the printed book, you can buy the particular e-book. It is make you better to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

James Murray:

What is your hobby? Have you heard that question when you got college students? We believe that that concern was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. So you know that little person including reading or as looking at become their hobby. You have to know that reading is very important and book as to be the factor. Book is important thing to provide you knowledge, except your teacher or lecturer. You discover good news or update about something by book. Amount types of books that can you choose to use be your object. One of them are these claims Indexing Techniques for Advanced Database Systems (Advances in Database Systems).

Mike Edwards:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from your book. Book is created or printed or descriptive from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for you actually. From media social including newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Indexing Techniques for Advanced Database Systems (Advances in Database Systems) when you needed it?
