Dr. John Leyba PhD

"[A] welcome addition to the reference materials necessary for the study of nurse anesthesia....The textbook is divided into logical, easy to use sections that cover all areas necessary for the practice of nurse anesthesia....This is a text that is easy to read and able to be incorporated into any nurse anesthesia chemistry and physics course. I would recommend this textbook to any program director."

--**Anthony Chipas, PhD, CRNA**
Division Director
Anesthesia for Nurses Program
Medical University of South Carolina

At last. . . a combined chemistry & physics nursing anesthesia text.

This textbook offers combined coverage of chemistry and physics to help students learn the content needed to master the underlying principles of nursing anesthesia. Because many graduate nursing students are uncomfortable with chemistry and physics, this text presents only the specific content in chemistry and physics that relates to anesthesia. Written in a conversational, accessible style, the book teaches at a highly understandable level, so as to bridge the gap between what students recall from their undergraduate biochemistry and physics courses, and what they need to know as nurse anesthetists.

The book contains many illustrations that demonstrate how the scientific concepts relate directly to clinical application in anesthesia. Chapters cover key topics relating to anesthesiology, including the basics of both chemistry and physics, fluids, a concentration on gas laws, states of matter, acids and bases, electrical circuits, radiation, and radioactivity.

With this text, students will benefit from:

- A review of the math, chemistry, and physics basics that relate to clinical anesthesia
- A conversational presentation of just what students need to know, enabling a fast and complete mastery of clinically relevant scientific concepts
- Heavy use of illustrations throughout chapters to complement the text
- End-of-chapter review questions that help students assess their learning

PowerPoint Slides available to qualified instructors.

From reader reviews:

Glady Curry:

This Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach book is just not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book will be information inside this reserve incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. That Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach without we recognize teach the one who examining it become critical in thinking and analyzing. Don't always be worry Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach can bring if you are and not make your carrier space or bookshelves' come to be full because you can have it within your lovely laptop even telephone. This Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach having fine arrangement in word and layout, so you will not feel uninterested in reading.

Jane Rich:

Nowadays reading books be than want or need but also work as a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with education books but if you want really feel happy read one having theme for entertaining including comic or novel. The actual Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach is kind of book which is giving the reader unstable experience.

Thomas Daniels:

People live in this new day time of lifestyle always try and and must have the spare time or they will get large amount of stress from both way of life and work. So , when we ask do people have extra time, we will say absolutely yes. People is human not just a robot. Then we request again, what kind of activity do you have when the spare time coming to an individual of course your answer can unlimited right. Then ever try this one, reading guides. It can be your alternative within spending your spare time, typically the book you have read is Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach.

Barbara Wheat:

Is it an individual who having spare time in that case spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Chemistry and Physics for Nurse Anesthesia: A Student Centered Approach can be the respond to, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these books have than the others?
