Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format)

Thomas E. Clark, Larry E. Collins

This course is a comprehensive multimedia instructional program in six modules, covering a complete study of formal Plane Geometry (based on Euclidean Geometry), and including a significant treatment of Geometry. Students are first led through a detailed re-teaching of basic geometric concepts, including an introduction into logical thinking. They then work through the development of fundamental terms, postulates, and theorems which explore the geometric relationships between simple closed plane curves in two dimensional space. Materials in the complete course include: video lessons, course notes, student work texts, solutions manuals, progress tests, and instructor's guides. This program is not the traditional "teachers at the blackboard with their backs to the students approach." It is inquiry based, and encourages the student to regularly pause the video lesson, engage in analysis, and discover the concept. The video lessons are designed to capture and hold the student's attention, through the use of animated, color-sequenced animation. As a result, because the student is more personally involved in concept development, understanding is deeper, retention is more pronounced, and concepts are transferred more easily to new problem situations.

From reader reviews:

Virginia Cherry:

Information is provisions for folks to get better life, information currently can get by anyone from everywhere. The information can be a information or any news even a problem. What people must be consider when those information which is inside former life are hard to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format) as the daily resource information.

Marshall Jackson:

People live in this new morning of lifestyle always try to and must have the time or they will get large amount of stress from both way of life and work. So , whenever we ask do people have extra time, we will say absolutely without a doubt. People is human not only a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will unlimited right. Then ever try this one, reading ebooks. It can be your alternative in spending your spare time, typically the book you have read is actually Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format).

Delores Keener:

This Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format) is great publication for you because the content that is certainly full of information for you who also always deal with world and still have to make decision every minute. This book reveal it info accurately using great arrange word or we can state no rambling sentences inside. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but tricky core information with wonderful delivering sentences. Having Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format) in your hand like obtaining the world in your arm, info in it is not ridiculous one. We can say that no publication that offer you world with ten or fifteen second right but this guide already do that. So , this really is good reading book. Hey Mr. and Mrs. active do you still doubt this?

Mark Guerrero:

Is it you actually who having spare time after that spend it whole day by watching television programs or just telling lies on the bed? Do you need something new? This Geometry: A Complete Course (with Trigonometry) (VideoText Interactive, Module A: DVD Format) can be the answer, oh how comes? The new book you know. You are and so out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
